

Coding Style Guide for Team 3

The coding style that will be employed for the duration of Team 3's project will be the style referenced and uploaded to 'Code Project' by Tony Manjaly. For future reference, the style guide can be found at this web address: <https://www.codeproject.com/Articles/8971/C-Coding-Standards-and-Best-Programming-Practices>.

Due to personal preferences of the team, we will deviate from the style guide on certain criteria Listed below:

- All indented tabs will be four spaces in length, as opposed to the specified notation of 2 spaces. Two space indents will only be used in instances of line-wrapping.
- While Class declarations will still use Pascal casing, Camel case will be used for function names.
