Location: S386

Material under Inspection: Development Build

Creators: All

Members Present: Brianne, Kyle, Heramb, Janelle, Jack, Mackenzie, Kevin, Nhi, Ix (late), Evan (late)

Comments

For the bug party, the team split into two teams (Team 1: Brianne, Kyle, Heramb, and Janelle; Team 2: Jack, Mackenzie, Kevin, Nhi, Ix). Each took an Oculus Rift headset and did their best to find and record as many defects as possible.

In total, the group found 32 defects:

- 17 were found by both groups (53.125%)
- 10 were only found by Team 1 (31.125%)
- 5 were only found by Team 2 (15.625%)

Most of the issues found were related to bugs in the VR touch controller interface. All issues were logged into the defect database after the team debriefed on the bugs.
