CMPT 371
Team 3
April 3, 2017

Meeting 4:30 pm – 5:00 pm

Purpose of meeting: Communicate final issues before the end of the project.

Group Members Present: Janelle, Mackenzie, Kyle, Heramb, Kyle, Nhi, Evan

Meeting Location: S371

Summary:

- The Luxsonic workstation is on campus, set up and working
    - It appears to be causing motion sickness in some team members.
        - Is it an issue with the graphics card? No, that matches the department workstations.
        - Could be a vestibular mismatch due to the small room and the guardian system.
- Dr. Babyn has provided musculoskeletal 3D volume scans for us to use, if we can.
    - 3D scan functionality is possible in theory, but Ix will need to try to implement it today.
    - If it doesn't get done today, it will not get done before the demo.
- Team wrap-up: maybe do lunch on the 13th?
- Arlin Schaffel of Noodlecake might come to the demos on Thursday (he works with the Unity engine)
- Team's priority is bug fixes and tests for the remainder of the ID.
    - Mike encourages us to do what we need to to get a good mark in the class
