CMPT 371 Material Inspection:

Date: February 14th 2017

Location: SPINKS S341

Time start: 5:00PM

Time end: 6:00PM

Material under Inspection: Testing Plan

Creators: Evan, Brianne, Brady, Ix

Facilitator: Janelle

Notetaker: Brady

Attendees:

- Brady
- Evan
- Heramb
- Ix
- Kyle
- Jack
- Janelle
- Mackenzie
- Sylvia

Items Discussed:

Section 1 - Grammar Fix

Section 2.2 - Scrapped main menu idea, make sure scene is registered.

Section 2.3 - Controllers register with a button press, testing is needed for controller input.

Not a smoke test in this iteration.

Section 3.1.1 - Scrapped.

Section 3.1.2 - Scrapped.

Section 3.1.3 - Not in this iteration, will be added when the file system is built (**ID3**) To be rewritten.

Select only <u>one</u> at a time (for the moment).

Section 3.1.4 - Needs proofread and slight rewriting.

Section 3.1.6 - Discussed the idea using a gesture, bin or toggle button for removing monitors.

Section 3.1.7 through Section 3.1.14 are satisfactory/unchanged.

Section 3.1.15 - Scrapped

Section 3.1.16 - Scrapped.

Section 3.2.3 - Feature On/Off and Off/On… (???)

Section 3.2.4 - Moved to a "could have" feature. Inefficient. Client may have additional info on this.

Section 4 - Skipped over, as this whole section is needing to be rewritten / revamped.

Section 6 - Discussed adding, "Only tested [these files] because…." **AND** "Didn't test [these files] because…."

Section 9 - Outdated, needs to be rewritten.

Discussion points that arose during the inspection

Discussion: GUI - Hide/Transparent main menu button. Discussed an idea of moving images closer / farther. The images should be pushed away from the user, **instead of** the user being pushed away from the image to reduce motion sickness / eye strain.

Discussion: Standardize UI element names. (ie What's a tray? What's a monitor?) Too much confusing overlap currently.

Discussion: Put a health warning in the system. On startup, or documentation?

Other discussions prior to the inspection process on the same day are located in the "MeetingFeb14.docx" file.
